Jerseys are more shapely than they used to and a little longer. There is a good deal of diversity in the shapes. They are all, how-ever, more or less braided. Fur is to be much worn on the handsome type of reception and ball gown, and this on pale-colored cloth, has long been em-ployed in Paris for evening gowns, and bordered with narrow brown fur, makes a lovely gown, particularly if crystal or tinsel passementerie is laid above the fur. The novice, to whom cloth evening gowns are unknown, will scarcely believe how the bodice of pale cloth can be moulded to the figure; indeed, with some of the cream and pale flesh tints, the plain bodice, trimmed simply with dark fur, has quite a startling effect. The effect is taken for granted, but no girl who knows how to dance is going to button herself up French belle, either to favor this sort of eventation of being the best dressed woman.
